

Connecting to AirNC-Secure with Android

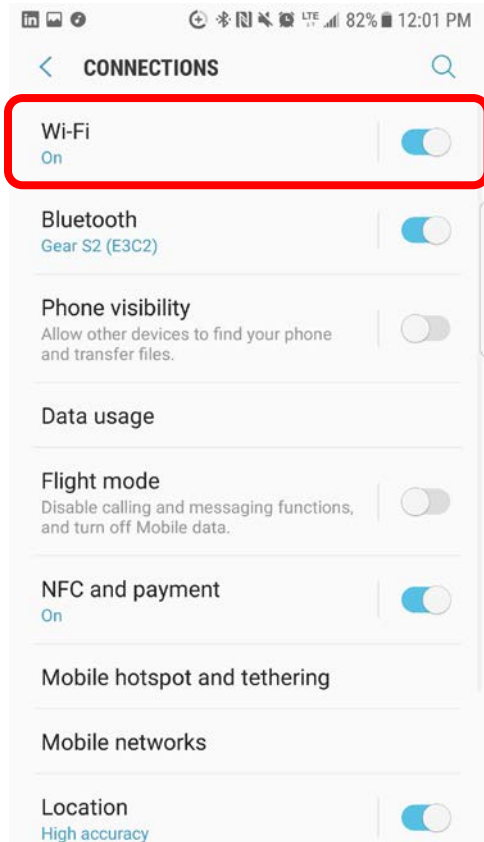

1. Click **Settings**

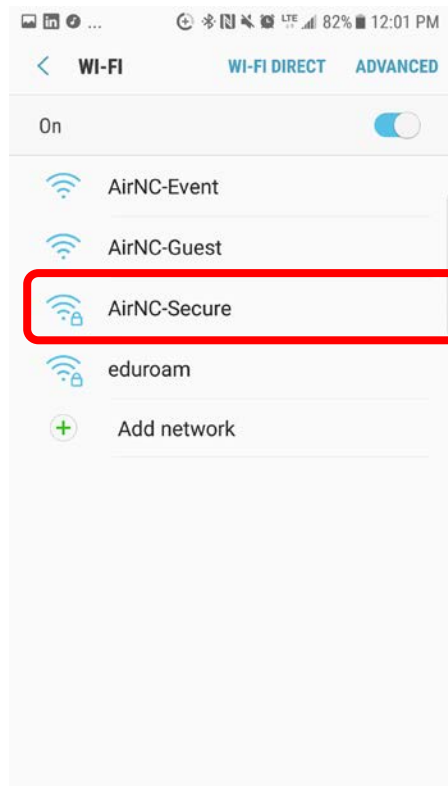

2. Click **Connections**

3. Click **Wi-Fi**

4. Click **AirNC-Secure**

5. Scroll down and fill in your **username** and **password**

The screenshot shows an Android VPN configuration interface for a profile named "AirNC-Secure". The interface includes several dropdown menus and text input fields. A red rounded rectangle highlights the "Identity" and "Password" sections. The "Identity" field contains the text "bbusername", and the "Password" field contains "bbpassword". Below these fields are three toggle switches: "Show password" (checked), "Auto reconnect" (checked), and "Show advanced options" (unchecked). At the bottom of the configuration window are two buttons: "CANCEL" and "CONNECT". A standard QWERTY keyboard is visible at the bottom of the screen, with the "Done" button highlighted in blue.
